

Government-Compliant Solutions For IT Infrastructures

Emerson Network Power's comprehensive list of TAA and BAA compliant products, together with documentation to back our claims, ensures a smooth sales and deployment process for contractors and partners serving the US government.

Several laws in the United States serve to recognize and support manufacturing and employment in this country. Among these are the TAA (Trade Agreements Act) and the BAA (Buy American Act). General guidelines of the two can be summarized as: The Buy American Act comprises a two-part evaluation to define a "domestic end product" or "domestic construction material." Under TAA, the criteria involves evaluating the country of origin and any "substantial transformation" that has taken place in the manufacturing/assembly process.

Relationship With ARRA

Agencies need to comply with these acts when utilizing funds under the ARRA (American Recovery and Reinvestment Act). While the definition of "domestic manufactured construction material" inside the BAA requires manufacturing in the United States, it does not include a requirement with regard to the origin of the components. The TAA impacts non U.S. regions, where countries such as Iran, Malaysia and the People's Republic of China are currently excluded from being TAA approved.

With solutions from Emerson Network Power, you not only obtain expert advice, you achieve the energy savings, flexibility and systems availability you demand.

Compliant Products List:

Our Trade Compliant Solutions							
Power	Code	Monitoring	Code	Racks And Integrated Cabinets	Code	Cooling	Code
Liebert GVG UPS (TAA version of GXT)	T	Liebert SiteScan Web	B	Knurr DCM Rack	B	Liebert Datamate	B
